

MIADERMA

Fungal Nail Treatment

Medical Device CE₀₄₈₁

- **Proven to effectively treat the moulds that cause fungal nails.**
- **A unique mix containing ISK1320®, also known as 'INSTANT KILLER'. These ingredients penetrate the whole of the nail's surface, killing fungi within 20 seconds.**
- **Stops other nails from becoming infected, protects against fungi returning and contains essential oils.**

General advice: Before using Miaderma Fungal Nail Treatment liquid, read the instructions carefully, even if you have used this medical device before. The information contained in a new pack may have been revised in order to reflect the latest scientific insights and data. Nevertheless, you should use Miaderma Fungal Nail Treatment liquid with care in order to obtain good results. Keep these instructions – you may need to refer to them during treatment.

Application: Miaderma Fungal Nail Treatment liquid is a medical device that helps in the treatment of fungal nails (onychomycosis). Fungal Nail Treatment liquid has been proven to be effective in the treatment of the moulds that cause fungal nails. The unique formula containing ISK1320® also known as 'INSTANT KILLER', contains ingredients that penetrate the surface of the nail, killing fungi within 20 seconds. The liquid forms a layer on the nail, creating an environment that is unfavourable to fungi growth and acting as a physical barrier to prevent the spread of moulds. Apply the liquid to the fungal nail twice or three times a day, using the handy applicator brush.

To achieve faster, better results, carefully filing the fungal nail once a week is recommended. If treatment is stopped, the fungal nail will return more quickly. It is therefore important to continue using Miaderma Fungal Nail Treatment liquid until the fungal nail has gone.

As damp environments are one of the causes of fungal nail infections, it is strongly recommended that you wear socks made only of absorbent materials, such as cotton or wool. This is important, as moulds are commonly found in moist environments, where they can multiply. If you have a fungal nail, it is important that you keep your feet dry.

Dosage and use: Miaderma Fungal Nail Treatment liquid is for external use only. Apply the product to the affected area twice or three times a day (mornings and evenings, for instance) until the fungal nail has fully grown out.

Thanks to the ISK1320®, 20-second instant kill formulation, the applicator brush does not become infected with the fungi, preventing infection/reinfection of the other nails and protecting against any return of the moulds. Miaderma Fungal Nail Treatment liquid can be combined with the use of oral antimycotics.

Mode of action: Thanks to a unique combination of ingredients, Miaderma Fungal Nail Treatment liquid forms a layer, which creates an unfavourable environment for the growth of fungi in the nail plate. It also forms a physical barrier that inhibits the spread of moulds. Miaderma Fungal Nail Treatment liquid reduces the nail's acidity, creating an unfavourable environment that stops the growth and spread of fungi.

Side effects: To date, no side effects have been observed.

Use during pregnancy and/or breastfeeding: No information is available regarding the use of Miaderma Fungal Nail Treatment liquid during pregnancy or the breastfeeding phase. If you are pregnant or breastfeeding, consult your doctor or pharmacist before using.

Warnings:

- For external use only;
- Keep out of the reach of young children;
- Not suitable for babies and toddlers;
- Avoid contact with the eyes and mucous membranes;
- Consult your doctor if there is no improvement within two weeks.

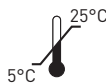

Do not use Miaderma Fungal Nail Treatment liquid if:

You are hypersensitive to any of the ingredients.

- Do not apply to open wounds or damaged skin.
- Do not bondage tightly.
- Do not apply heat to the area of application.

Composition: Aqua, Ethoxydiglycol, ISK1320®, Pentylene Glycol, Alcohol Denat., Tridiceth-9, PEG-40 Hydrogenated Castor Oil, Benzyl Alcohol, Melaleuca Alternifolia Leaf Oil, Limonene, Glycerin, Natilact, Propylene Glycol, PVP, Xanthan Gum, Eucalyptus Globulus Leaf Oil, Lavandula Hybrida Oil, Lactic Acid, Linalool, Dimethyl Isosorbide, Citrus Aurantium Dulcis Oil, Pogostemon Cablin Oil, Disodium Phosphate, Geraniol, Citral, Biotin, Coumarin, Citric Acid, Farnesol.

Contents: 5ml

Storage instructions: Store in a dry and dark place at room temperature (5-25°C). Keep out of the reach of young children.
